Warren Wants the Windows Closed,

Softly she slipped out of bed, tip-tood over to the door and opened it noise-lessly. At once she felt the relief of a faint breeze. The open door had cre-ated a slight draft: soon the room breathe bearable, and Helen dozed off to sleen.

She was awakened by a lond, vicious anging. "Why in thunder was that door

The room was in a blaze of light, and Warren, in his pajamas, was striding over to close the window.

"Dear, we can't stand it shut up in here," profested Helen, sitting up in bed. "We'll both be sick! Why, we've never slept in a room with everything closed." Refusing to Answer.

"Warren," she whispered tentatively, uncertain as to whether he was asleep.

She waited for a few moments, then

No Capitulation.

But surely he would not let her lie out here all night on this hard, narrow couch! He would soon realize how unreasonable he had been and would want the window open, for even he could not sleep in there long without air.

Helen was straining for the sound of the opening door and for Warren's slippered step coming after her. Already her back ached with the hardness of the narrow sofa, her head ached, and her thosat sched, too, with forced-back sots. On, why did Warren let her lie out here?

Then came the thought that perhaps he had already opened the window, and was waiting for her to come back and find it already open. Softly she stole to the bedroom door and softly turned the knob. But the window was still closed. The room was suffocating, and Warren, under the many covers, was anoring heavily.

Warren's Sound Sleep.

Warren's come and the lay

Warren did not come, and she lay there nursing both her grievance and her unhappiness At length her thoughts graw confused and she dozed—a troubled, unrestful self-consciousness. In the last hour it had grown much colder, a sudden change of temperature that often comes toward morning. The curtains which had hung so limply were not billowed out by a sharp north wind. And Helen in her half doze lay there shivering under the one thin counter-

pane.
At length a sound of spluttering steam aroused her. It was morning:

I have seen the widow several times since the night she asked me to kiss her. If I expected her to blush at our next meeting after that sacred rite, or foolish performance (which ever you choose) I was disappointed. She was so self possessed and so unconcerned, that I wondered if I dreamed it. We are together very much during the day, lust as usual, and I am wondering if this ignoring of what happened means that the net is closing around me, or if it has opened and I am at liberty to escape. I confess to greater interest than if she had followed up her affectionate demonstration, and would like to know if that is just the effect this meat clever weman is seeking.
